

Home Assist

The assistance company can send you a plumber in the event of breakage of pipes and/or leakage from sanitary fittings/fixed water installations or an electrician to restore the energy supply in your home. In the event you have lost your house keys or the locks are damaged making your home insecure or impossible to access, a lock smith can also be sent to assist you. In the event of damage to your home's external glass doors or windows, the assistance company can also send you a glass worker who will carry out the emergency repair to secure your house against further loss or damage.

The policy will cover the costs of the workers' transportation, materials (excluding sanitary fittings and electrical appliances) and labor costs.
